## OUR PRICES

We quote a two-way price for each CFD we offer. This two-way price consists of a "Bid" (the lower price which is the price at which you as a client may "Sell" the CFD) and an "Ask" (the higher price which is the price at which you as the client may "Buy" the CFD).

The difference between our "Bid" and our "Ask" price is commonly referred to as our "Spread". For example, if the quote for the EUR/USD currency pair is 1.29100 against 1.29103, then the Spread is 0.3 pips. Our Spreads are either fixed or variable.

## LEVERAGE TRADING

Trading on leveraged capital means that you can trade amounts significantly higher than the funds you invest with Magnasale. Your initial capital will therefore only serve as the margin. High leverage may significantly increase the potential return, but it may also significantly increase potential losses. The leverage is specified as ratio, i.e. as 1:25, 1:50, 1:100, 1:200 or 1:300. This means that clients may trade with amounts substantially higher than invested in a particular CFD.

Sometimes the leverage is expressed in percentage terms – and referred to as Margin requirement. A leverage of 1:100 represents a margin requirement of 1%.

Magnasale offers leverage pending on the currency and type of client and the leverage ratio is decided

on an individual basis. Clients will be informed of their available leverage ratio by Magnasale's Client Services Department.

## **INITIAL/ REQUIRED MARGIN**

Initial Margin or required Margin refers to the amount needed in order to open and maintain a position, in addition to the initial loss that will occur due to the spread. The Required Margin is derived from the following formula:  $(\text{Amount} * \text{Instrument Price}) / \text{Leverage} + (\text{Amount} * \text{Spread})$ .

## **CHARGES AND COMMISSIONS**

Depending on the instrument and/ or client set up, Magnasale will charge commissions. Commissions may consist of mark-ups on spreads, minimum fees or may be based on the amount of volume traded.

Additionally, Magnasale may charge you for a daily overnight rollover charge for open positions if held overnight. The method of calculation of the overnight charge varies according to the type of asset to which it applies. Moreover, the amount of the overnight charge will vary between different assets as it is linked to interest rates related to each asset and in addition to an extra financing charge defined by us.

## **DEPOSIT**

Magnasale's minimum deposit is equivalent USD 50,000. Deposits can be made via BACS only. Magnasale only accepts inward remittances from bank accounts solely in the name of the client.
