

Equity CFDs

Over 2000 CFDs

Equity CFDs

Wide range of stock exchanges

Finalto offer over 2000 single stock CFDs to a wide range of the largest global stock exchanges, including Amsterdam, Frankfurt, Hong Kong, London, New York Singapore and Sydney.

We are continually adding new products and are responsive to adding new names to our offering. We proactively look to add new IPOs as they emerge, ensuring your trading offering remains current and matches your business goals.

Strong liquidity

We offer incredible liquidity that stretches beyond the traditional stock exchanges. Via smart order routing we source liquidity from primary and secondary venues to offer clients access to large pools of diversified liquidity.

Short selling liquidity is enhanced with access to multiple stock loan lenders.

Favourable market rates

Leveraged trading with margin rates from 5%.

We offer 20 global stock exchanges (including)

Execution speed

Finalto's unique combination of powerful technology platforms, global footprint and depth of liquidity means we are able to deliver fast and reliable execution.

Corporate actions

Finalto handles all relevant corporate actions such as stock splits and dividends for the client side. This takes pressure away from your dealing team and reduces your monitoring function, freeing up precious resource.

Technology

Our technology performs detailed liquidity analysis to ensure clients are constantly receiving the best possible pricing. And through our continuous investment in our trading platforms, we are able to automate corporate actions and cover all back-office requirements and offer you the reporting and API tools to manage this.

The information provided here is for general information only. Our offering includes products that are traded on margin and carry a high degree of risk to your capital. It is possible to incur losses that exceed your initial investment. You should ensure that you fully understand the risks involved and seek independent advice if necessary. Any information provided shall not be construed as investment advice and has been prepared without taking your individual objectives and financial situation into account. CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.
