

NDFs

Non-Deliverable Forward CFDs

Non-Deliverable Forward (NDF) CFDs

Finalto takes the complexity out of Non-Deliverable Forwards with a revolutionary NDF offer that does away with the product's associated issues, providing a streamlined forex solution that can slot smoothly into any existing infrastructure.

Removes common problems

- **Tailored Feeds:** We can offer tailored price feeds based on your size and type of flow to create the optimal trading conditions for your needs.
- **STP & Hedging Flow:** We can tailor our solution to suit both straight-through processing (STP) and clients who wish to hedge order flow.

Seamless integration

Finalto's new offering is designed to slot seamlessly into the client's existing infrastructure, putting NDFs into the client's hands without their commonly associated headaches. Now, clients from small hedge funds to money managers and everyone in between can get fundamental exposure to FX markets without worrying about fixing dates and settlement risk.

NDF trades will be available in the below currencies initially:

- Indian rupee
- Indonesian rupiah
- Korean won
- Brazilian real
- Chile peso
- Colombian peso and Taiwan dollar

Rupee, rupiah and won trading will be available 22 hours a day. Brazilian real will follow Brazilian exchange trading hours.

"The complexities of NDFs have caused large parts of the retail market to miss out on trading opportunities. We've abstracted some of those complexities to allow seamless integration into existing systems and offerings. Let us take away the hassle so you can focus on trading."

Andy Biggs

The information provided here is for general information only. Our offering includes products that are traded on margin and carry a high degree of risk to your capital. It is possible to incur losses that exceed your initial investment. You should ensure that you fully understand the risks involved and seek independent advice if necessary. Any information provided shall not be construed as investment advice and has been prepared without taking your individual objectives and financial situation into account. CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.
